Create your environment

Whenever and wherever an interior space has to a be divided, Maars is a partner you can trust to turn your plans into reality, for projects large or small, be they purely functional or luxuriously innovative.

When you talk to us, you are talking directly to the manufacturer. Just tell us what you want, and we will have the perfect solution. Or we will work with you to develop and produce it. In other words, 'Create your environment'.

Maars has many years of experience in a multitude of different projects, nationally and internationally. Most of all, Maars is there to help translate your ideas into practical, flexible, aesthetically pleasing interiors, where it is a pleasure to live and work.

Maars styleline. Probably the most frequently used partition system in Europe. Why? Because, quite simply, no other system can be so easily adapted to the customer's wishes and requirements.

The styleLine series represents the ultimate in flexibility and versatility, whatever the budget and whatever the building situation.

Maars styleline | standard. Simple. Economical. Functional. Available in standard modules for applications such as basic, practical offices in industrial surroundings.

Maars styleline | variant. Brings a new meaning to versatility with limitless permutations of wall layouts, module widths, thicknesses, glass, door and cupboard elements, colours, insulation properties, etc. A truly universal system for a wide variety of projects.

Maars styleline | finesse. The crème de la crème of partitioning systems in the styleline range providing a smooth, flawless finish with elegant detail, and, of course, like all the styleline range, finesse is simplicity itself to move and reuse.

High-quality materials. Perfect craftsmanship. Just because styleLine partition walls are the most economical in the Maars range, this certainly does not mean that we have made concessions on quality. Nothing could be further from the truth. This partition system also uses high-quality materials and techniques to produce partition walls that satisfy the highest standards, even when the budget is tight.

For instance, in our advanced spraying-plants, all visible metal components are given an extremely durable, attractive polyester-epoxy coating in your choice of colour. For wallcovering, you can choose from a wide range of materials, colours and designs.
